

musa
simplify your front office

When experience meets simplicity

Musa carries on its mission with experience and determination obtained from more than 30 years of professional service: **simplify and automate business processes, reduce waiting times and increase customer satisfaction.**

We are particularly sensitive to current market needs: constant research and analysis are part of our processes. Competent technicians, electronic and mechanical designers and software programmers support a team of experts that analyse the market and project feasibility before moving into the operational phase.

We develop and produce extremely innovative and versatile solutions both in Italy and abroad: smart applications, completely made in Italy, that provide simple yet strategic results, in terms of both economics and efficiency.

Looking to the past to envisage the future

Our team has been working together with passion and professionalism to develop Office Automation solutions since 1976. Thirty years of research, development, sales and technical product assistance has made us one of the most experienced businesses in Italy. Our success stories, the prizes we have received and, most importantly, our consistent customer satisfaction have led us to invest in research in technologies and innovation for the Front Office.

Manage customer relationship processes
with the greatest **SPEED** and **SIMPLICITY**

Three product lines for a unique solution

The technology of our products aims to streamline and simplify all the front office activities. Data capture systems, booklet dispensers and solutions are the three product lines.

MUSA RS - Data Capture Systems

- All-in-one multi-functional terminals
- Super-compact professional scanners
- Multi-functional kiosks

Unique equipments for acquiring and digitalising data and documents, designed specifically for banking, insurance, professional services, administrative offices, hospitals, diagnostic centres, as well as for shopping centres, public services, etc.

The extreme versatility of these machines allow them to adapt, in both form and performance, with precision and speed, to various user needs.

MUSA CS - Booklet Dispensers "on demand"

Systems to produce personalised booklets on demand including checkbooks, vouchers, coupons, completely aligned with parameters regarding time and space optimization, waste avoidance and inventory.

Solutions

Our solutions are developed for simplification. They are designed to meet reception, contract, access control needs and are in line with regulations regarding security and privacy.

They are highly customisable and offer private businesses as well as public entities economical and practical solutions to meet customers' needs.

The advantages from the Musa solutions:

- Greater front-desk efficiency
- Shorter queues at the counters
- Greater security and privacy
- Significant cost reductions
- Less paper and greater care for the environment
- Customer perception of excellence
